PROFESSIONAL SUMMARY

UI/UX and Product Designer with 3+ years of experience designing end-to-end digital products across fintech, Web3, SaaS, and healthcare verticals. Proven track record shipping real consumer products — including a live invoicing SaaS (Invoera), an AI-powered recipe app (ChopSense), and a WhatsApp-based drug verification bot (DrugCheck NG) serving Nigerian public health. Expert in Figma, design systems, and mobile-first interaction design. Unique differentiator: works fluently across design and code (React Native, Next.js, Framer) — bridging design and engineering in ways most designers cannot. Available for US remote roles and open to relocation.

CORE SKILLS & TOOLS

Design Tools	Figma (Advanced), Framer, Canva, Adobe Creative Suite
UX Skills	User Research, Wireframing, Prototyping, Usability Testing, Information Architecture, User Flows, Journey Mapping, Design Systems
UI Skills	High-Fidelity UI, Component Libraries, Responsive Web, Mobile App Design (iOS/Android), Visual Design, Typography, Colour Theory
Front-End	React Native, Next.js 15, HTML/CSS, Tailwind CSS, Framer Motion
AI Tools	Claude API, AI-assisted design workflows, Midjourney (familiar)
Platforms	Figma Community (published plugin), GitHub, Vercel, EAS/Expo, Convex
Soft Skills	Stakeholder Communication, Design Critiques, Cross-functional Collaboration, Self-directed Building, Remote-first Workflow

WORK EXPERIENCE

Founder & Lead Product Designer · Iced Pixels Studio

2023 – Present

Lagos, Nigeria · Remote

- Founded an independent design studio specialising in fintech and Web3 product design, serving clients across Nigeria and remotely.
- Designed and shipped Invoera — a full-stack invoicing SaaS for freelancers with 30+ screens, custom design system, Paystack and Stripe payment integration, and live deployment on Vercel.
- Built and shipped ChopSense, an AI recipe app (React Native/Expo + Claude API), delivered to EAS Update for real-device testing; designed all 20+ screens including onboarding, ingredient input, and meal planning flows.
- Architected DrugCheck NG, a WhatsApp-based drug verification bot integrating Claude vision API against a database of 8,700+ NAFDAC-registered drugs — live on Render, actively used.
- Delivered client websites for Pat Joe Solar Energy (patjoesolarenergy.com) and Hytex Kitchen & Bakery World (hytexkitchenequipments.com) — both live with full SEO setup.
- Published Silhouette Stroke, a Figma plugin, to the Figma Community under the Iced Pixels Studio brand.

Product Design Intern · Perxels Design School

Sep 2023 – Feb 2024

Lagos, Nigeria

- Co-delivered product design curriculum to cohorts of 20+ students covering UI design, UX research, wireframing, and prototyping using Figma.
- Authored design briefs, project templates, and course learning materials adopted into the core syllabus.

- Reviewed 50+ student projects across cohorts, conducting structured design critiques that accelerated student outcomes and portfolio quality.
- Participated in internal design reviews to refine course content and maintain industry-standard quality benchmarks.

UI/UX Designer · Pimpmyhome Lagos

2022 – 2023

Lagos, Nigeria · Remote

- Designed end-to-end UI/UX for a home improvement platform — covering service browsing, vendor discovery, and booking flows from zero to high-fidelity.
- Produced wireframes, user flows, and interactive prototypes that reduced the stakeholder feedback cycle by structuring design reviews around testable Figma prototypes.
- Established a visual design language aligned with the brand's warm, aspirational positioning in the home and lifestyle category.
- Iterated across 3 major design rounds based on user feedback, improving task completion clarity across core service flows.

Product Designer · Oma Empire

2022 – 2023

Lagos, Nigeria

- Designed digital products for clients end-to-end — from discovery and user flows through to final high-fidelity deliverables — across web and mobile platforms.
- Collaborated with clients to translate business requirements into user-friendly interfaces, maintaining brand consistency and visual quality across all deliverables.
- Operated across multiple concurrent projects, managing timelines and design iterations independently.

SELECTED DESIGN PROJECTS

Invoera | [Fintech SaaS](#) · UI/UX + Front-End

- Designed a full-featured invoicing application for freelancers and small businesses — 30+ screens covering invoice creation, client management, payment tracking, and financial dashboards.
- Built a frictionless onboarding flow tested for non-technical users; designed for both mobile and desktop with a consistent, trust-forward visual language (Inter font, #4361EE accent, dark palette).
- Shipped the full-stack product: Next.js 15, Convex, Better-Auth, Paystack, Stripe, Resend — live on Vercel with custom domain.

ChopSense | [AI Mobile App](#) · [React Native](#) / [Claude API](#)

- Designed and shipped an AI-powered recipe suggestion app that generates personalised meal ideas from available ingredients — complete with step-by-step cooking flows, nutritional info, and meal planning.
- Created a warm, food-forward visual system with expressive typography; onboarding captures preferences upfront to personalise AI outputs from session one.
- Delivered to EAS Update for real-device testing (GitHub: [aniezesidney6-source/ChopSense](#)).

DrugCheck NG | [Public Health](#) · [WhatsApp Bot](#) / [Claude Vision API](#)

- Designed the full conversational UX for a WhatsApp bot enabling Nigerians to verify drug authenticity in real time against 8,746 NAFDAC-registered medications.
- Mapped edge cases: unreadable packaging, expired database entries, regional drug name variations — ensuring the UX remained accessible for users with low health literacy.
- Designed a companion web admin interface for health workers to manage the drug database and review flagged submissions. Live on Render.

Zentra | [Fintech Mobile](#) · [AI Banking App](#)

- Designed a full-featured AI-powered banking app with spending behaviour insights, card management, transaction tracking, and financial dashboard — applying fintech UI best practices around trust, data clarity, and information hierarchy.

VaultSave | [Web3](#) · [Crypto Savings Wallet](#)

- Designed a Web3 savings and crypto wallet app covering deposit, withdrawal, and portfolio tracking flows with a modern dark-mode interface optimised for DeFi users.

VESSEL | [Digital Legacy App](#) · [20-Screen Spec](#)

- Designed a complete 20-screen digital legacy platform with a 3-stage accent system (Pale Iris / Dusty Rose Violet / Luminous Sage), Cormorant Garamond + DM Mono typography, and full interaction spec.

30-Day App Design Challenge | [Design System](#) · [6+ Apps Shipped](#)

- Designed 6+ distinct apps (Mise en Place, Ledger, Roam, Jobbr, and more) sharing a strict common design DNA: Oswald 700 + DM Mono, 1px outlined card system, iridescent glassmorphism nav bar, 4px base spacing unit.
- Demonstrates design system discipline — the same component logic scaled across entirely different product categories with only accent colour and surface colour changing.

EDUCATION & CERTIFICATIONS

Product Design Programme · Perxels Design School

2023

Lagos, Nigeria

End-to-end product design: UX research, wireframing, Figma prototyping, design systems, UI principles.

West African Senior School Certificate (WASSCE) · Secondary School, Nigeria
